x-organization

- “This document should be read only by people directly involved in project XXX”
  - “... might be *modified* by senior people”

Surprisingly difficult to implement!  
with preventive methods

- **a posteriori access control**
- don't **prevent** misbehaviour, but **deter** it
- rather than trusting who others trust, trust the one who are **accountable**
  - we need **auditing**
- related work:
  - prior: Audit Logic
  - new: Combination with Trust Management
